In exploring and learning this week...

This week the children have been talking about their experiences of going to the dentist, thinking about how to keep their teeth healthy and looking carefully at their teeth. They have loved brushing their teeth in school and we have talked to them about the importance of brushing their teeth twice a day.

What we will be looking at next week

We will be building on their interest in teeth and find out about bones. We will be learning about our skeletons and making comparisons with animal skeletons, including dinosaurs. If anyone has any bones, skulls, antlers or fossils we would love to share these with the children.

Upcoming dates/events

Please name PE kits and make sure they are in school every Thursday.

Forest school: please make sure all children in Stars class have warm clothes including hats, gloves, scarves and extra jumpers.

Rocket will be starting their sessions after half term.

Stay and read sessions: Every TUESDAY
2:40pm Siblings are welcome

The Big Challenge!

Encourage children to feel and identify different bones in their body, using vocabulary such as skull, spine, ribs, jaw, collar bone, wrist, ankle, elbow... They could even have a go at making, drawing, painting their own skeleton. Don't forget to share these with us on tapestry.
