

Tremendous Teeth

This week we have had a great time exploring our Big Idea of teeth! We have been building animals with lots of teeth in block play, looking in our mouths and painting pictures of what we can see, practising going on a trip to the dentists in our role play area as well as talking about how our teeth grow and change throughout our lives. We made lists of all the things we needed to do and use to look after our teeth and wrote instructions on how to brush our teeth. The children have loved making toothbrushes in the workshop and even made some false teeth! It was great to see some photographs of some of our children and their own trips to the dentist in the 'movey up and down chair' posted on Tapestry this week! We have also had a bug focus on being number experts this week and will continue to celebrate all our great number investigations next week too!

Next week's Big Idea and Big Challenge

Next week we will be building on from the children's fascination in teeth and moving onto our next Big Idea of Bones. Can you draw around your body and label all the different types of bones that are inside. Visit the library and see if you can find any books about bones? Talk about where you might find bones? What do you call the people who find bones for their job? Have you ever found a bone? have fun exploring and learning!
