In exploring and learning this week...

This week the children have enjoyed becoming archaeologists, searching for bones to add to the bone museum they have made. They have been looking carefully at our skeleton and have been fascinated by the skulls from different animals. We have also had fun exploring the snow and ice.

What we will be looking at next week

Next week we will continue looking at bones and skeletons. We will be thinking about the size of different bones, what animals they might belong to and where in the body they could find them.

Upcoming dates/events

Please name PE kits and make sure they are in school every Thursday.

Forest school: please make sure all children in Stars class have warm clothes including hats, gloves, scarves and extra jumpers.

Rocket will be starting their sessions after half term.

Stay and read sessions: Every TUSEDAY
2:40pm Siblings are welcome

The Big Challenge!

Please continue to talk to your child about the different bones in their body and have a go at identify them. Compare with animal bones what is the same /different?

Encourage your child to draw, paint or make a skeleton. Don't forget to share these with us on tapestry.
