

Big Idea: 10 Ways to Help Save the World

This week we have had a great first week back learning about all the ways we can help our planet. We have talked about rubbish and recycling, made posters about how we can help reduce the amount of rubbish by being more sustainable. We have even become litter pickers around school and made our own recycling centre in the mud kitchen. On Tuesday we had the great pleasure of having a visit from Mr Rayner who is a bin lorry driver, and his friend Tyler the lorry loader. We were all very excited to see how the back of the lorry tipped up and were lucky enough to see inside the cab and we all listened carefully as they answered our questions. This has inspired lots of work in exploring and learning such as drawing pictures of bin lorries, building bin lorries in construction and becoming bin loaders ourselves! We have also been learning about plastic pollution in the oceans and even made a sea life rescue centre in the role play area.

Next week's Big Idea and Big Challenge

Our new Big Idea will be Sharks. What do your children already know about sharks? Why not take a trip to the library and take out some fact books all about underwater creatures? What interesting information can you find out? At school we have been practising writing Did you know...? questions - maybe you could encourage your child to make their own fact book using all the things they have learnt?
